

## CITY'S LIBERTY LOAN QUOTA IS \$9,300,000

DALLAS AND HARRIS COUNTIES HAVE SAME AMOUNTS TO RAISE IN CAMPAIGN.

## WAR TRAINS ARE READY

Cars Carrying Captured Trophies Will Leave Old Santa Fe Station Tomorrow Night.

Dallas and Harris Counties will carry the heavy burden in the fourth Liberty loan campaign. Apportionment of the quota was made yesterday by J. W. Hoopes, executive manager of the campaign. Every county chairman in Texas has been advised of the quota for his county.

The quota for Dallas County is \$10,600,000. The same amount, was apportioned to Harris County. The Dallas County quota was divided between city and county as follows: Nine million and three hundred thousand dollars to be raised in the city proper and \$1,200,000 to be raised outside the city in the county.

These are by far the largest quotas in Texas. Bexar County's quota is \$3,700,000; Tarrant County's quota is \$4,000,000. Drouth conditions are assigned as the reason for the smallness of the quotas in those counties.

"Amount of quota received," said a telegram received by Mr. Hoopes last night from Chester H. Bryan, chairman of the Harris County Liberty loan committee, "Harris County is thoroughly organized and is prepared to get where we are going, hopeful of raising the quota in record-breaking time."

### Confident of Success.

Similar assurances have been received from other sources in the district, and closing weeks of hard work in the preparatory campaign, Mr. Hoopes faces the beginning of the campaign with confidence that it will be a success. One of the most thorough advertising campaigns in the history of the Liberty loan issues has been made and the propaganda favoring the campaign has been widespread. People throughout the State are singing "My Boy and Your Boy," posters proclaim the message of the Fourth Liberty loan in every town and city of the State and the speaking campaign will be thorough.

Several towns in Texas will be furnished with airplane exhibitions during the campaign. Major Sneed, the commanding officer of Love Field, has agreed to furnish Mr. Hoopes with aviators for this purpose. Exhibitions have been scheduled as follows: Sept. 27 at Garland, two ships and four aviators; Sept. 28 at Whitewright and Henderson, one ship at each town; Hillsboro, Oct. 1 and one ship each day.

In these exhibitions the airplanes will bomb the towns with Liberty loan literature and then they will give exhibition flights. Some of the latest stunts will be given. The airplanes will be brought to the ground and the people afforded an opportunity to inspect them. The officers accompanying them will explain the various points of the mechanism.

### Trains to Leave Tomorrow.

Lieutenant McCann, who is in charge of the preparation of the war relic trains, said last night that everything will be in readiness for the starting of the tour tomorrow night. The cars for

## To Avoid Spanish Influenza, Which Is Like La Grippe

These suggestions are given by Dr. A. W. Carnes, City Health Officer, for the avoidance of Spanish influenza, which differs from the old and well-known malady, "la grippe," only in degree, if at all, and possibly also in being somewhat more contagious:

Keep out of crowded, congested public places as much as possible, and keep in the open, breathing fresh, pure air.

Avoid contact with persons sneezing and coughing, for by those means all catarrhal contagions are spread.

Keep bodily secretions active and bowels open.

If you begin to sneeze and cough, go home and stay there until you recover, for sneezing and coughing are the first symptoms, being followed by aching bones and fever, and other well-known symptoms of la grippe.

### FOR THOSE AFFECTED.

The great danger from la grippe, or Spanish influenza, is in the resultant maladies. As with la grippe, the illness itself is not very serious, unless it is allowed to develop into pneumonia or other complications. Consequently, the care of a physician is advisable and the patient should stay at home and in bed until he recovers. Pneumonia following la grippe or Spanish influenza often proves fatal, and even if pneumonia does not develop, lack of proper care during la grippe or Spanish influenza may result in other complications and catarrhal conditions that may be serious. La grippe or Spanish influenza either is most likely to affect the young or the aged or those below normal health, and for them also there is greatest danger of complications and bad after effects.

When stricken by the malady persons should keep away from the public as much as possible and avoid spreading the disease; also they should cough, sneeze and expectorate into their handkerchiefs, and not into the air around them, for someone else breathing the same air may thus get the contagion.

Dr. Carnes said yesterday that only five cases of Spanish influenza have so far been reported in Dallas. Major Earthman, camp surgeon at Camp Dick, said none has appeared there to date.

By proper precautions, Dr. Carnes said, the spread of the contagion in Dallas may be cut down to a minimum. If these are not observed the disease may become as general and as alarming as it has in some of the Northern cities.

## SWIMMING POOL CONCERT AT CAMP DICK TONIGHT.

Because the park funds of the city have been exhausted the city of Dallas

## To Mr. Kendall Chairman Dallas Liberty Loan Committee

We, the undersigned employees of Hurst Bros. Co., Main at Field street, realizing the importance of the Fourth Liberty Loan, without solicitation from the firm or anyone else, pledge ourselves to be at our posts of duty between the hours of 9 and 11 a. m. Monday, Sept. 30th, and will cheerfully entertain the Bond Selling Committee; we will each write at least one letter to a friend "Over There;" we will all sing "Your Boy and My Boy," and center every thought on the success of "Our General" and "Our Boys," who even now may be crossing the Rhine.

## ALL DAIRYMEN ARE PUT ON SAME BASIS

### ORDINANCE AMENDED SO AS TO PERMIT OUTSIDE SHIPMENTS INTO DALLAS.

Without opposition or discussion, the City Commissioners yesterday passed an amendment to the dairy permit ordinance, so as to allow dairies outside of Dallas County but within a radius of 100 miles of Dallas, to ship milk into the city on the same terms as Dallas County dairymen. The old ordinance doubled the permit fees for dairies outside of Dallas County and quadrupled them for dairies more than 100 miles from Dallas.

The provision quadrupling fees for dairies more than 100 miles from Dallas was left unchanged, but this was not regarded as material, as costs of shipping rise so high for more than 100 miles that little milk would be shipped in from such distances. The fees are, annually, \$1 per cow up to five cows, 80c per cow from five to ten, 60c from ten to twenty, 40c from twenty to fifty, 20c from 50 to 100 and 10c for all over 100 cows. The old provision doubling fees acted as a bar to outside of Dallas County dairies shipping milk into Dallas. The amendment was passed by the City Commission, following the reading of the following recommendation from Mayor Joe E. Lawther: "I have requested that the City Attorney prepare the attached amendment to

## RULING ON LIGHT WEIGHT CATTLE BENEFIT TO TEXAS.

The United States Navy has agreed to reduce the weight limit on beef specifications until the larger arrivals of prime beef later in the year. It was announced yesterday in a bulletin from the Federal Food Administration. This puts the navy on the same basis with the army and the armies of the allies and is expected to relax the pressure on high specification beef and thus to ameliorate high price levels in prime cattle at present maintained. It also gives a more equitable position to the lighter weight cattle, which is of much interest to the cattlemen of the drouth-stricken portions of Texas.

No positive minimum weight is to be specified, but the army, navy and allies authorities will mark the beef a slaughter falls at selected slaughter points from 850 pounds downward if weight is sufficient minimum to secure desired supplies.

### POSTPONE MEETING UNTIL LOAN DRIVE IS OVER

The regular meeting of the Hadassa Society has been postponed until after the Liberty loan drive. During the last two weeks the women of the society have been endeavoring to enlist all the Jews of Dallas as members of the Zionist Association for the relief of the Jews of Palestine. The Zionist Association has already sent to Palestine a medical unit equipped for hospital service and the Hadassa Society has undertaken to furnish the needy of that country with clothing and hospital supplies. The society holds the same place among the Jewish women that the Red Cross does among other women, and it has been so recognized by the Government.
