Have You Voted?

While a large number of members have voiced their opinion in regard to changing the By-Laws with reference to the meeting night, there still remains quite a number who have not voted. We would like to have the opinion of the whole Society on this matter so send in your vote before April 25, as the time for voting expires on that date.

Health News

Time to get after that early brood of flies, says the United States Public Health Service. Better to prevent the breeding of hundreds of flies now than to swat and trap millions of them in mid-summer.

The United States Public Health Service estimates that over seven million people in the United States are infected with malaria.

"Public Health is purchasable," says the United States Public Health Service, and adds that a first-class health protection service can be provided for one dollar per head per year. In fact some city health departments render excellent service at a cost of seventy-five cents per head. Let's all get together and give better support to health work in this community.

Estimates prepared by the United States Public Health Service indicate in the South the ravages of typhoid fever, tuberculosis, hookworm, and pellagra, all together are not as serious as those caused by malaria.

Still relying on the Patent Medicine Almanac? Better discard it and get the new one issued by the United States

Our soldiers fought hardest in the last days of the war. Don't quit now.
