 At Fort Sheridan 140 new cases have been reported and authorities there have permitted members of the resident training corps to leave to escape infection.

Chicago health officials are fighting the spread of the disease here. From Rockford reports come that there are 350 cases of virulent gripe, said not to be Spanish "flu" at Camp Grant and the authorities there are taking every step to remedy the situation. Twenty-five army camps throughout the country are now seeking to prevent the spread of Spanish influenza. The surgeon general's office at Washington reports 20,211 cases. Fear Wilson to Act in Metal Trouble

By International News Service
SEATTLE, Sept. 24.—The possibility that President Wilson may show his displeasure at the action of the Seattle Metal Trades Council in calling all shipyard workers from the Seattle yards Saturday afternoon by issuing a work or fight order similar to that against the Bridgeport, Conn., munition workers is declared to be the cause of considerable worry to local labor leaders today.
 That the President has been informed of the council's action is indicated in a telegram received by Henry McBride, local federal mediator, from Everett Macy, chairman of the wage adjustment board of the United States shipping board.

Christmas Some Christmas shopping will have to be done early

This year the Government has taken a hand in the Christmas Shopping problem. Two demands among the several regulations touch everybody:
 —No extra holiday help may be employed in stores.
 —Open hours may not be extended.
 —In other words, the Christmas trade, which usually takes hundreds of extra salespeople, making many extra hours.
 —Must (not "may" or "should," but "must") be carried on without increased labor or time.
 —The only solution is, Early Christmas Buying.
 —Most of those who wait until the last minute will not get waited upon at all.
 —This especially applies to Toys, Bicycles, Scooters—all such Christmas things. Why not buy now?
