Division of Preventable Diseases.

Nothing of importance occurred in connection with communicable diseases during the year. The influenza epidemic, which began in September, 1918, ran into the early months of 1919. A small epidemic of typhoid fever occurred in the Mott Haven District.

Incidence of Communicable Diseases.

	1918.	1919.
Diphtheria	1,868	2,251
Scarlet fever	864	718
Measles	3,935	1,384
