

RENDER!

SWER!

IS POUNDING GERMANS, NAGE SEDAN RAIL LINES FROM ARGONNE TO MEUSE

an Battalion, Surrounded by the Boches, is Desperately Until Rescued by Comrades; ed States Troops Capture Chatel Chehery.

(By Associated Press.)

On the Argonne forest to the Meuse the American army
was struck at the German positions before the Kriemhilde
a great battle seems impending. This sector is most im-
portant to the Germans, as a defeat there would send them back
in the direction of Sedan, thru which runs the great trunk rail-
road which connects the Germans as far west as Laon with Ger-
many. The Americans have brought up their heavy artillery and
every evidence that a terrific struggle is to be expected on
it.

On the western side of this battle line the Americans moved
forward today and captured Chatel Chehery as well as important
positions just east of the village.

of us
godspeed, we send these
love and good wishes.

of Verdun, Oct. 8 (9 a. m.)—An Amer-
ican battalion that had been cut off
and surrounded in the Argonne forest
last Friday was relieved Monday night
when its comrades broke thru the stiff-
est German resistance and rescued it.

On the advance last Friday the
Americans had to go forward thru
dense undergrowth. The men of the
battalion noticed Germans slipping to
the rear but believed that they would
be "mopped up" by the second Amer-
ican line.

The enemy groups succeeded in hold-
ing up the assault of the second Amer-
ican column with the result that the
battalion was cut off.

When the advanced element were
sent back to maintain contact with the
main body they encountered the enemy
in their rear.

Huns Take Shelter In Old Trench.

The Germans took shelter in an
evacuated trench system that the

FROM SUIPPE RIVER.

Successful continuation of the French advance north and north-
east of Rheims is menacing the security of the Laon massif. After
capturing Berry-au-Bac, the French are fighting their way into
Conde-sur-Suippe at the junction of the Aisne and Suippe. Prog-
ress northward from these towns would outflank both the Cham-
pagne and Laon positions and make untenable the lines of both the
Aisne and the Retourne. In the center by entering Isles-sur-
Suippe and capturing Bazancourt, the French apparently have
broken the German hold on the Suippe and made necessary a re-
tirement to the Retourne or Aisne, further north.

On the north the Belgian and British pressure is maintained

100 NEW 'FLU' CASES REPORTED FOR DAY AND 9 MORE DEATHS

Total Cases in City 524—Hospitals Are Ordered to Take Only Emergency Surgical Cases—Courts Adjourn and Schools Remain Closed.

INFLUENZA SITUATION TUESDAY.

Total number of cases, estimated, 524.

New cases in last twenty-four hours, estimated, 100.

Deaths in last twenty-four hours due to influenza, or with influenza
contributing, 9.

Hospitals ordered to take no surgical cases except those classed as
emergency; wards and rooms to be reserved for influenza victims.

Bureau orders list of all nurses who refuse to take influenza cases.

Sweeping and flushing of city streets ordered.

Reinspection ordered of all places where large numbers of people con-
gregate.

All stores, restaurants, shops and offices ordered to ventilate their
places properly, even if electric fans have to be used.

WITH at least 100 new cases of influenza and nine
deaths due either directly or indirectly to the
contagion within the past twenty-four hours,
the plague is not under control in Denver.

The situation, however, is so well in hand
and such energetic measures to check the rav-
ages of the disease have been instituted that it

is believed at the bureau of health that the crisis soon will be
reached in this community.

Physicians and nurses are worked to
the limit, due to the spread of the
 scourge. A few nurses have refused to
 accept influenza cases and have there-
 by brought down the condemnation of
 the bureau of health upon their heads.

All nurses' exchanges have been asked
 to report names of nurses who refuse
 to take cases. Hospitals have been
 asked by the bureau and its advisory
 board to take such cases.
