undoubtedly contracted as the result of drinking water from a spring near 718 Rosemont Avenue. Parents should caution their children not to drink from this spring, which was found to be grossly polluted.

The city engineer has been directed to drain this spring, which

During the current year eight deaths have been charged to typhoid fever. Two individuals contracted typhoid while away from the city within thirty days prior to illness; two cases were imported; two drank from irregular water supplies, and in two instances the cause of death was not definitely determined.

IN MEMORIAM

Resolutions of tribute to the memory of Dr. J. H. Landis, late Health Officer of Cincinnati, offered by Dr. E. W. Walker, were adopted at a special meeting of the Board of Health, Saturday, August 24, 1918. The resolutions, which read as follows, were ordered spread on the minutes and a copy sent to the family.

Our esteemed Health Officer, Dr. J. H. Landis, died this morning, August 27, at the age of thirty-three, hundred and eighty-eight.

By his death the City of Cincinnati is robbed of one of her best officials and the medical profession loses a shining star. It can rarely be said of a man that he perfectly fits the position he has occupied. Of Dr. Landis it can, however, be truthfully said that he was the man for the place. Morally, mentally and socially he found his niche. He was a man of many fine attainments; he was an eloquent speaker, a great student and always abreast of the times. As an executive officer his ability was unquestioned. He was held in highest regard by the men who worked under him. His writings, which were numerous, were copied everywhere by those who were interested in those things dear to his heart. Everything that he undertook he entered into with vim and vigor which always brought victory. He has filled many honorable positions besides that of Health Officer. He was President of the Academy of Medicine, physician at St. Mary's Hospital, and Professor of Hygiene at the Ohio-Miami Medical College. He was also a member of many medical societies—local and national. His services as a speaker were in great demand at medical meetings, and in no case did he disappoint his hearers. His manner, voice and clarity of diction made him easy to listen to and to understand. His honesty of purpose, strength of character and unswerving faith in doing what he thought right, made him a tower of strength in all his undertakings.

"It can be truly said of him 'Well done thou good and faithful servant'."
