Is It Possible To Believe It?

Is It Possible To Believe It?

There are 1,890,000 people, of all ages, in Virginia who did not buy a bond of the second or third Liberty Loan.

There are 2,262,000 in North Carolina;

There are 1,369,000 in South Carolina.

There are 1,065,000 in West Virginia (in the 5th district);

There are 1,105,000 in Maryland.

This, too, is upon the assumption—on the side of liberality—that none of the people who subscribed to the second loan subscribed to the third. This we know, of course, is not the case.

What can these people who are able to buy say in extenuation? How can they ever look a returned soldier boy in the eye? What will be their relation to those who have done their part when we show an honor roll of deeds done after the war?

Following is the cable reply of General Pershing to the governor of the New York Reserve Bank on the occasion of the General's birthday:

"I am very greatly touched by your felicitations upon the occasion of my anniversary, and I thank you sincerely.

"The fourth Liberty Loan will be a magnificent success if your fellow-citizens put into the subscriptions the same spirit that your soldiers put into battle."

Can the people fail to put the "soldiers' spirit" into the loan?
